

Hypothesis Tests: Mean Power Estimate to Option Value Difference.
Vanilla Call Option. 16384 Paths/Estimate.
GBM Model vs. Merton Model. Two-sided Test.

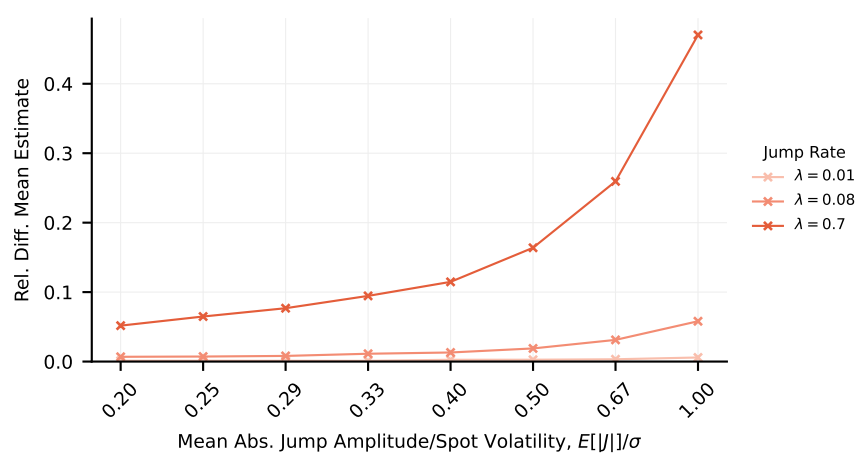

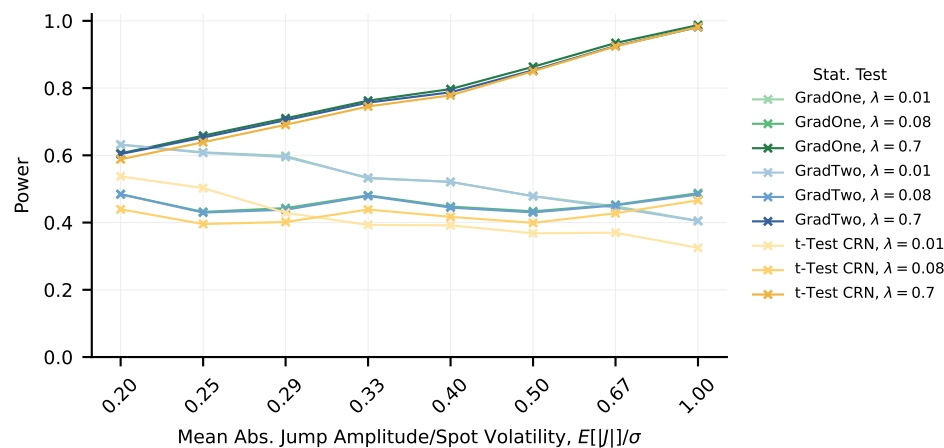

(a) GBM Model vs. Merton Model, Vanilla Call Option

Hypothesis Tests: Mean Power Estimate to Option Value Difference.
Vanilla Put Option. 256 Paths/Estimate.
Vasicek Model vs. MRJD Model. Two-sided Test.

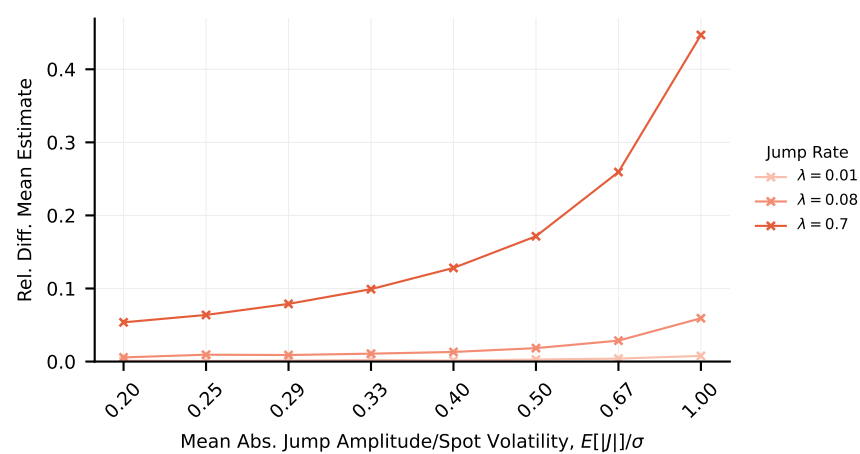

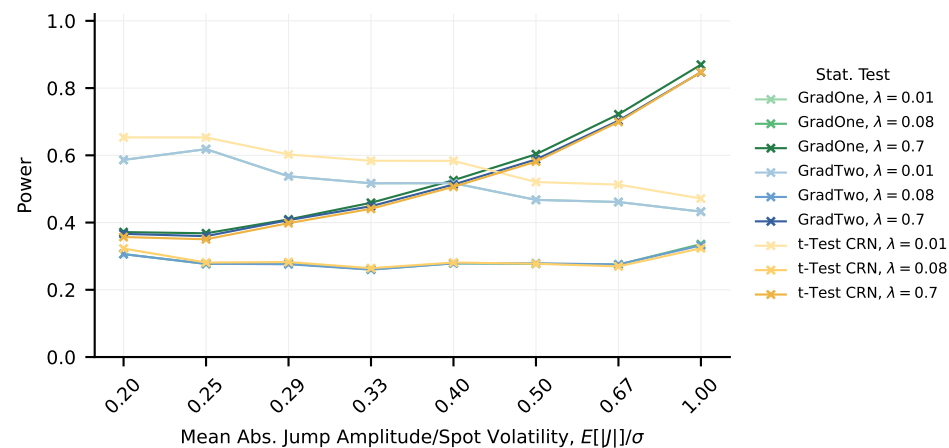

(b) Vasicek Model vs. MRJD Model, Vanilla Put Option

Hypothesis Tests: Mean Power Estimate to Option Value Difference.
Asian Call Option, 4 observations. 256 Paths/Estimate.
Vasicek Model vs. MRJD Model. Two-sided Test.

(c) Vasicek Model vs. MRJD Model, Asian Call Option, 4 observations

Hypothesis Tests: Mean Power Estimate to Option Value Difference.
Asian Put Option, 12 observations. 256 Paths/Estimate.
Vasicek Model vs. MRJD Model. Two-sided Test.

(d) Vasicek Model vs. MRJD Model, Asian Put Option, 12 observations
